

Burial of mutilated bodies without DNA identification test is a worrisome act: BSO Azad

Press Release

Central Spokesperson Baloch Students Organization Azad expressed concerns over the discovery of ten mutilated bodies on previous days from the surrounding areas of Quetta, and added that the state institutions are mentally torture the relatives of Baloch missing persons by declaring the mutilated bodies unknown and burying them without DNA identification test.

Since last two decades, the discovery of mutilated bodies of missing Baloch children, youth, women and elders including the students has gained severe intensity in Balochistan.

Before this incident, mass graves or bodies have been discovered in Balochistan. In December 2013, approximately 170 mutilated bodies were discovered from a mass grave in Tutak, Khuzdar which were buried without any DNA identification test

and were declared unknown, while mass graves have been discovered from Panjgur, Dera Bugti and other areas of Balochistan too.

The spokesperson said that we have severe concerns that the mutilated bodies which were discovered from surrounding areas of Quetta are of the Baloch missing persons. Since last two decades, state institutions have enforcedly disappeared thousands of people from Balochistan which is still continued with intensity, while hundreds of mutilated bodies of the Baloch missing person have been discovered.

On the basis of continuous violation of human rights in Balochistan by the state institutions, we say reliably that the state, in order to hide its severe crimes to world, buried the mutilated bodies without the DNA test and declared them unknown.

The spokesperson added that the issue of mass graves and mutilated bodies discovery is becoming much severed, while the silence of international institutions along with international media is further reinforcing the state barbarism.

Therefore, we appeal to the United Nations, international representatives and international media that they, despite being silent, should make a fact finding mission, send it to Pakistan, and under their own supervision, collect DNA data of the mutilated bodies recovered from mass graves in different areas of Balochistan.

Unveiling arrest of missing Hasnain Baloch from Karachi

is a failed attempt of state to hide its crimes: BSO Azad

Press Release

The Central Spokesperson Baloch Students Organization Azad (BSO-A) condemned unveiling of missing Hasnain Baloch son of Abdul Qayoum Baloch's arrest from Karachi and declaring him as a terrorist who was disappeared from Quetta by the state of Pakistan.

The spokesperson added that the state is implementing on its conspiracies which are aimed to close the doors of education to the Baloch youth by connecting them in the fake case in order to achieve its heinous objectives.

Connecting Hasnain Baloch, a matriculation student, with the militant groups on one hand is clearly aimed to keep the Baloch students at a distance to the educational institutions and on the other hand is to malign the cases of more 40,000 Baloch missing persons. Unveiling arrest of Hasnain Baloch from Karachi is in fact the part of the attempts to hide the state crimes.

The extrajudicial killings and crackdown on the Baloch

nationals, particularly the Baloch students, are the part of old policies of state, and now proving state's illegal acts as legal by declaring the Baloch students as terrorists is also the sequence of the ongoing state policies.

The spokesperson further said that the state secret agencies had enforcedly disappeared Hasnain Baloch along with his brother Jihand and father Abdul Qayoum from their residence in Quetta at 2 am on November 30, 2018.

A press conference was held on December 1, 2018 against the enforced disappearance of Hasnain Baloch and his brother in Quetta Press Club (QPC) by their family which was followed by a protest rally for their release on December 7, 2018; protest rally's record is present in the media even. But despite all this, facts are hidden and a student is declared as a terrorist which is worst and inhuman act against the humanity. The military and civil institutions of the state are united in attempts of hiding their crimes of enforced disappearance and extrajudicial killing of the Baloch nationals. The media, disrespecting its journalistic principles and values, are fulfilling their duty of becoming state collaborator in this heinous act.

The spokesperson said that the international human rights institutions should take measures on immediate basis for the safety of the Baloch nationals and Baloch students in Balochistan, and should bring the state's civil and military institutions in the International Court of Justice (ICJ), so that the Baloch nationals without any fear continue their political, educational, social and economic activities on their own land with peace.

State commits the economic murder of Baloch fishermen through exploitative projects: BSO Azad

Press Release

The Central Spokesperson Baloch Students Organization Azad (BSO-A) termed the Gwadar Port and the Expressway like exploitative state projects as the economic murder for the fishermen, and added that the safe and important hunting spots of the fishermen have been completely destroyed due to such exploitative projects.

The initial effects of the CPEC like destructive projects have paralyzed the Baloch people economically that people are unable to manage meals for themselves, and now the right to earn is also being

snatched from the Baloch people in order to completely destroy them under the umbrella of this project. The fishermen are facing difficulties since last year due to the CPEC, Expressway project and the economic exploitation.

The coastal length of Balochistan is 770 kilometers, and the source of income of the people living on this strip is dependent on fishing. 80 percent poor people are linked with the profession of fishing for managing their meals of two times and for passing life, but the state is snatching the right of life from the poor and oppressed people under the shelter of its projects.

The Spokesperson further said that the day when this exploitative project CPEC has begun, since then the difficulties of the fishermen have greatly increased which caused the fishermen to stage a protest camp with empty stomach for the last several months which is continued until today.

The state and its institutions are responsible for the economic, social, educational and political exploitation of all walks of people including the fishermen. The state is promoting the policies to convert the Baloch people into minority over their own land by using the excuse of development. The state, under its policies of economic murder, wants to finish the Baloch

national identity by engaging the Baloch nation with different issues.

The Spokesperson said that the fishermen, peasants, labors and people from other walks of life, with the potential of social and political consciousness, have to increase the speed of their national struggle in order to fail state's filthy projects by understanding the aims and objectives of the state tactics and exploitative projects.

The Baloch Missing Persons Issue and Silence of UN

Press Release

For last 2 months, Baloch mothers along with their infants and children are protesting in front of the Quetta Press Club (QPC) for the safe recovery of their beloved ones. Temperature in Quetta is dropping regularly which is affecting the health of organizers as well as the participants.

In this blood freezing winter, people normally can't sit in their homes without heater, but the infant and their mothers, sisters, brothers and the sympathizers are sitting in an open cold area at the token hunger strike camp with their constitutional demand to present their disappeared beloveds to the courts of law and not to abduct or torture them in secret cells because disappearing a person is a collective punishment which is like dragging the entire family beyond the bars too.

Education is one of the basic rights for every human being and obviously a priority for the civilized nations. Primary education is further important for strengthening the base for higher education, but the Baloch children like Mahrang Baloch; daughter of abducted BSO Azad's Central Cabinet Member Naseer Baloch and Ansa Baloch are demonstrating in their most sensitive phase of age.

Few days before they were afraid of facing camera, people and media but now Mahrang and Ansa became the face of this issue.

The protest demonstrations and hunger strikes became the part of their primary education which they couldn't forget at any stage of their lives.

The action of abduction is a crime against humanity and Pakistani security agencies and military institutions are committing this crime on daily basis across the Occupied Balochistan without any fear of national and international accountability, and this state crime with clear means come under the jurisdiction of the Baloch genocide.

Due to the total media blackout in Balochistan, none of the cases of enforced disappearances come under the media coverage, but the international community and the international media should not deliberately ignore the protesting children and mothers of the Baloch missing persons who are demanding justice for a long time.

The Vice Chairman Voice for Baloch Missing Persons (VBMP) Mama Qadeer Baloch has been hospitalized due to extreme cold weather and he has been strictly suggested to avoid sitting in cold weather further.

Despite this all, there is no hearing of the beloved ones of the Baloch missing persons and the state of Pakistan is failed to give a serious response to this peaceful protest of the Baloch women and

children.

It is very disgraceful to see the silence of United Nations (UN) including the international human rights organization despite the exposure of the war crimes of the UN member state Pakistan. If they continue their policy of being silent spectators, then the Baloch missing persons' issue will convert into a regional humanitarian crisis which is not a good sign for regional peace.

Despite this all, BSO Azad appeals to UN and all other international human rights institutions for taking notice of the Baloch missing persons issue on immediate basis and taking concrete measures for its solution within no time and play their due role for the safety of humans of the Balochistan, otherwise the world in the history of human kind will sooner witness the worst humanitarian crisis of the Occupied Balochistan just with regrets.

Military institutions' operations have increased instead of recovering the missing persons: Chairman Sohrab Baloch

Press Release

Baloch Students

Organization Azad (BSO-A) Chairman Sohrab Baloch with strong words condemned

the given threat of serious consequences to the Baloch mothers and sisters

including Mama Qadeer Baloch who are sitting at the Voice for Baloch Missing

Persons' (VBMP) camp.

He added that families

of the missing persons are demanding to the state institutions

for the safe recovery of their beloved ones while using different peaceful means of protest under the flag of VBMP for last 10 years.

The missing persons' families say that if their beloveds are guilty of any crime, then punish them according to the law. But this decade long peaceful protest has been neglected and the state institutions, lost in their power, are expressing intransigence.

Chairman Sohrab Baloch said that the state's military institutions have increased their operations multifold. He said that more than 40,000 Baloch sons of soil have been disappeared by the state military institutions.

He added that the Voice for Baloch Missing Persons and Baloch Human Rights Organization (BHRO) have staged protest demonstrations and rallies against the increase in the illegal action of the enforced disappearance of people from Balochistan.

Families have also done legal and lawful protest for the safe recovery of their beloved ones, but the civil and military institutions of the state have neglected these demands and prefer the use of force instead which is a robbery of the oppressed nation's rights.

Chairman said that the families of the missing persons are sitting in front of the Quetta Press Club (QPC) for the safe recovery of the beloved ones for last two months, but the state institutions have completely neglected the peaceful protesting families which have compelled them today to transfer their protest from QPC towards the Balochistan Chief Minister House, and the families protested in the cold weather of Quetta by establishing high level examples of courage and bravery. But the state, which is afraid of the peaceful protests, threatened the families of serious consequences and forced the families to end their peaceful protest which is included in the serious human rights violations.

He said that the state military institutions continues the enforced disappearance of the Baloch people on one hand, and the civil institutions using the language of military institutions are threatening the families of the Baloch missing persons of serious consequences on other hand. This behavior of the civil institutions shows that the civil and military instituters similarly think about the issue of Baloch missing persons.

Chairman appealed to the Baloch people to fully support the families of the Baloch missing persons that the issue of the Baloch missing persons would be public with its right means to the world.

The 20th December and International Human Solidarity Day

Press Release

The 20th December and International Human Solidarity Day

There are about 17 Sustainable Developmental Goals which have been introduced by the UN to achieve a better and sustainable future for all.

The 20th December, a day of action to encourage new initiatives for the eradication of poverty, hunger and disease. We appreciate UN and international communities for their positive steps towards zero hunger and provision of good health services.

But the question arises here is that the word sustainable means 'able to be maintained at certain level', and for sure

UN considered this certain level as vast level. So if we take that into our consideration, there must be eradication of poverty and health problem from the entire population of world.

So in this International Solidarity Human Day, our reservations must be clear to the world and UN that they should give some serious consideration to their plans. According to the UNDP report, Balochistan is the poorest province of Pakistan with having the poverty index of 71%. The MPA Sana Baloch of Balochistan in his last statement said that the people of district Kharan need good health facilities and he also shared some pictures at social media platform where people are compelled to cut trees to accomplish their needs while the land is the owner of the Sui gas on other hand.

The people of Raskoh and Chaghi are suffering from different kind of diseases including malnutrition. Chagai is the owner of Saindak and Rek-o-diq like projects and it is also a well known place being the sight for Pakistan's nuclear weapons tests which caused people of Chaghi to suffer from the cancerous diseases.

Polio, a viral disease which has been eradicated world widely except Afghanistan and Pakistan (mainly found in Balochistan). People of Bolan have been dying just because of the shortage of common medicines like Paracetamol, because Pakistan Army has imposed unannounced ban on the medicine supply to this area.

The area of Awaran is totally occupied by the Pakistan Army, but surprisingly the civilians are dying of gastritis, isn't it so strange? At last, we request the UN to come with us for a visit to the areas of Kohlu where people are deprived of basic health facilities.

In main city of CPEC, the owners of Deep Sea of Gwadar are dying of thirst. The inhabitants of villages near Gwadar city are complaining of Thalassemia in their new generations, even they have no history of Thalassemia before in their families.

On 20 December, we as Baloch students remind you again to show

solidarity with the Baloch people who need your actually solidarity.

The criminal activities of the state have suffered people to live in the environment of fear: BSO Azad

December 6, 2018

The criminal activities of the state have suffered people to live in the environment of fear: BSO Azad

Central Spokesperson Baloch Students Organization Azad (BSO-A)

in an issued statement condemned the enforced disappearance of Baloch students, generation of environment of fear in the educational institutions and disrupting the daily living of the Baloch people including the students with strong words, and added that the powerful military institutions of the state in collaboration with the civilian institutions has kept the sequence of crackdown on the Baloch students continued.

This crackdown is gaining intensity gradually. These criminal activities of the state institutions have made people of Balochistan to live with fear. On the previous days, a student of Bahauddin Zakria University, Jihand Bangulzai son of Abdul Qayoum, was enforcedly disappeared along with his brother Hasnian and father. While the first year medical student of Government Postgraduate College Quetta, Amin son of Abdullah, was abducted and shifted to an undisclosed location on the same day. Their whereabouts are still unknown.

On Wednesday of this week, several students which include Zareef Rind, Changez Baloch, Aurangzed Baloch and other several students have been disappeared forcibly by the state forces. Forceful disappearance of several students is a proof of generation of environment of fear.

Before these incidents, the administrations of the Bahauddin Zakria University and the Neshtar University have decided to form the list of Baloch students and to send it to the state security institutions which clearly clarify that the civil institutions are fully supporting the security forces for destroying the career of the Baloch students.

Including all above, the security forces have demanded the list of the Baloch students from the hostel administration of the University of Balochistan. These all policies of state show that they want to keep the Baloch students in the status of fear, close the doors of education to them and to further strengthen its policies of prolong its occupation over the Balochistan.

Neither the state of Paksitan is trying to generate the environment of fear in the educational institutions but also the Baloch people from all walks of life are being targeted

which shows their implementing of policies of wrapping the entire Baloch society in the chador of fear.

On previous days, the Ranger and white clothed personnel of the security forces have raided at several houses in the Lyari area of Karachi city and enforcedly disappeared three Baloch persons whose whereabouts are still not known.

The Spokesperson further said that the token hunger strike camp of the families of the missing persons under the flag of the Voice for Baloch Missing Persons (VBMP) is continued for a month for the recovery of missing persons. In this token hunger strike camp, hundreds of families which are affected of the enforced disappearance are peacefully protesting in the cold weather with their children for the safe recovery of their loved ones, but the state's legal and parliamentarian institutions are continuously ignoring them, and we condemn this ignorance in strong words.

Ignoring the voice of the Baloch mothers and sisters by the Balochistan chief minister and the high level authorities by becoming the state machinery shows that they have nothing to do with the Baloch people, but on the other hand they are busy in belly-worshipping by becoming just the state machinery.

The spokesperson appealed to the global institutions and the international media to play their role to make reach the voices of the families of the missing persons who are setting in the token hunger strike camp to the international community, so that the Baloch people would be saved from the vandal activities of the state with the help of the civilized countries.

51st Foundation Day of the Baloch Students Organization

November 26, 1967 is one of the historic days in the Baloch political history when the Baloch Students Organization (BSO) was formed with the aims of organizing the Baloch students on revolutionary platform that would help shape the Baloch society as the societies of living nations in world by educating the Baloch youth politically, literally and culturally, and to head towards the establishment of a free Baloch state.

Since its inception, BSO is struggling to make its aims and objectives a reality, because BSO knows that the Baloch youth are the national assets and the national builders, and with their intellect, creativity and skills, the Baloch society will be able survive and be identified as a living nation in world.

In its struggle, BSO has faced lots of troubles internally where parliamentarian mass political parties divided it for their party's purpose and externally where it remained on the main target of the state of Pakistan because BSO is the revolutionary and nation school of the Baloch nation, but BSO didn't let all those conspiracies to eliminate it from the Baloch political arena.

Today, BSO has become a symbol of revolution in the Baloch society whose central to zonal leadership and members have paid sacrifices in the struggle of keeping awaken the Baloch youth politically. A cache of central leadership, former Chairman Zahid Baloch, former Senior Vice Chairman Zakir Majeed Baloch, former Secretary General Sanullah Baloch, former Information Secretary Shabeer Baloch, two former Central Committee Members Hassam Baloch and Naseer Ahmed are still in the illegal custody of state facing inhuman torture.

Hundreds of BSO leaders and members sacrificed their lives during the struggle which includes former Secretary General Raza Jahangir Baloch, Central Committee Member Comrade Qayyum, Shafi Baloch, Qabar Chakar and lots more.

Baloch nation is in war with an uncivilized state which neither respects internationally recognized human rights nor its own constitution. Pakistan has converted Balochistan into a warzone where practice of politics and freedom of expression are banned and our national languages Balochi, Brahvi and others are restricted to be taught in schools, social fabrics are destroyed, educational system is poised and health department is ruined; Balochistan depicts the picture of 17th century place.

On the 51st foundation day, the Baloch Students Organization Azad pledges to continue its due role in the struggle for the restoration of Balochistan's independence.

The Baloch students face extreme state tyranny: BSO Azad

The Baloch students face extreme state tyranny: BSO Azad
November 17, 2018

Baloch Students Organization Azad (BSO-A) Central Spokesperson said in an issued statement that the International Students' Day is observed every year globally on November 17. The day when the Nazi Army attacked on Czechoslovakia in the beginning

of the World War II (WWII) in 1939 and imposed dictatorship. But in response, the students' organization of Czechoslovakia protested for the independence, democracy and against that unjustified occupation. In retaliation, the Nazi Army attacked on students, arrested several of them and executed nine among them. The November 17 is observed every year to commemorate those students and their sacrifices for a noble cause.

The Spokesperson said that BSO Azad has been struggling for the Baloch students and national rights since the very first day which made BSO Azad to face severe conditions from the state. The state began the sequence of the enforced disappearance of Baloch students in order to compel them to withdraw from their struggle of rights, and this sequence is continued with high intensity since many years till date.

The abducted Baloch students are kept in state's secret torture cells where they die during the infliction of inhuman torture while in the illegal custody, and finally their mutilated bodies are thrown. Many students have been killed through targeted-killing tactic which includes the central secretary general of our organization Raza Jahangir.

Several student leaders are illegally detained in the state secret detention centers for several years which include many leaders from the vice chairman of organization Zakir Majeed to the Secretary General Sanullah Baloch.

On the other hand, those Baloch students who are getting education in educational institutions are facing mental torture from the state, because all the educational institutions of Balochistan are converted into military camps, and hostels are raided on daily basis using excuses of security in order to torture the students psychologically.

In Balochistan, the state institutions under a policy are creating the environment of fear in the educational institutions which is aimed to close door of education and to keep Baloch students at a distance to education. While members of the organization are in a siege like situation in educational institutions and being compelled to quit education, but we have continued our struggle in this hard time too.

The spokesperson said that said to the Baloch youth and students that youth are the builder of nation and precious assets. In any society, the youth of the nation possess the

status of the back bone. As students, it is your responsibility to share awareness and knowledge in nation and make the Baloch nation feel the slavery, so that they continue their struggle against this tyranny, barbarism and national slavery.

Martyrs: The Beacon of Baloch Nation

Martyrdom is the expression of devotion. The people who bravely sacrifice their being for the motherland without any doubt are the real heroes for the nation. Every nation dedicates a day to the martyrs for their motherland and remembers the sacrifices of their heroes.

Similarly, the Baloch nation remembers its heroes who not only fight for the motherland but also are against all forms of discrimination among individuals or groups on the bases of religion, caste, creed, doctrine, race or ethnic origin.

The Baloch Students Organization Azad (BSO-A) has marked the 13th November as the National Baloch Martyrs Day in 2010 to commemorate the martyrdom of our heroes. To remember those thousands of men, women, children and elder daughter and son of Baloch nation, we know some of them by name and others are our unsung heroes who lay in unmarked graves.

We remember the sacrifice of the heroes who bravely devoted their lives in 19th century. On November 13, 1839, Mir Mehrab Khan, the ruler of Balochistan, refused to surrender against the powerful British imperialists who invaded Balochistan, knowing that he will be eventually defeated, but he fought till his last breath.

The Baloch nation has a long history of sacrifices, whether there were the Arab invaders or the Britain imperialist who came with the intention to occupy the Baloch land, but the heroes of Baloch fought till the last breath. Baloch heroes who laid down their precious lives for the bright future of next generations are beacon for the nation.

Remembering the inspirational words of Mehrab Khan "I may not defeat the enemy but I can die for my motherland" are the enlightenment for today's youth.

The day when Pakistan invaded Balochistan, then Baloch people took the yarn of Mehrab Khan, but did not surrendered. Many Baloch men, women and even infants have been killed by Pakistani forces in order prolong its occupation over the Baloch land, and the sequence of this brutal assassination is continued till today.

Baloch scarifies for the gain of sovereignty of its motherland, and will continue the sequence of sacrifice until Pakistan leaves our motherland and Baloch gains the free Baloch state.

The world has been turned into a global village and in the global village every minor issue has been discussed. The sovereign countries of world should take notice of the human rights violations taking place in Baloch land by Pakistan on daily basis. The world should intervene in Balochistan issue, stop the Baloch genocide and accept Baloch as a free nation.
