

Colonial system of education makes the students mental patient: Chairman Sohrab Baloch

Colonial system of education makes the students mental
patient: Chairman Sohrab Baloch

February 8, 2019

Quetta: Chairman Baloch Students Organization Azad Sohrab Baloch termed the suicide of Yousuf Pirkhani, a third year student, in Bolan Medical College (BMC) as a murder and added that state and its relevant institutions are busy in the struggle of expelling youth from the educational institutions under a conspiracy.

The administrations and teachers have adopted such a behavior with students which suffered the students to be in a state of nerviness, and this behavior has caused to increase the trend of suicide. The suicide incidences of the student of BMC Yousuf Pirkani, student of NFS Faislanabd Saifullah Baloch and student of Khyber Medical College clarify the point that the contractors of the colonial education system make students to suffer in mental pressure and in reaction to this pressure such dangerous incidents happen.

Chairman further said that the murder of students for their stubbornness and ego in the department of professional education is the insult of this sacred department. The ill-treatment of the administration and teachers which are implementing over the policies of the state in BMC and other educational institutions is the symbol of danger for the bright future of the oppressed students.

Chairman said to the Baloch students to promote the passion of solidarity and unity and struggle to fail the state policies. While appealing to the international institutions, he said that they should take notice of the oppressions over the Baloch students in Balochistan and play their role to save lives of the students of the oppressed nations.
